

## LIST OF PUBLICATIONS

1. “Sulla hölderianità delle soluzioni di alcune disequazioni variazionali con condizioni unilaterali al bordo”, **Annali di Matematica Pura ed Applicata** vol. 83 (1969), 73–112.
2. “Régularité pour une classe d’inéquations nonlinéaires”, **Comptes Rendus de l’Académie de Sciences de Paris**, tome 271 (1970), 23–25.
3. “Sur la régularité des solutions de l’équation  $\operatorname{div} A(x, u, \nabla u) = B(x, u, \nabla u)$  avec des conditions aux limites unilatérales et mêlées”, **Annali di Matematica Pura ed Applicata** vol. 93 (1972), 173–230.
4. “Equazioni ellittiche non lineari con ostacoli sottili. Applicazioni allo studio dei punti regolari” (joint paper with F. Conti). **Annali della Scuola Normale Superiore di Pisa**, vol. 28 (1972), 535–562.
5. “Proprietà di sommabilità e di limitatezza per soluzioni di disequazioni variazionali ellittiche”. **Rendiconti dell’Università di Padova**, vol. 40 (1972), 141–171.
6. “Punti regolari per una classe di operatori ellittici nonlineari”. **Ricerche di Matematica**, vol. 21 (1972), 1–41.
7. “Continuité des solutions d’une inéquation parabolique” (joint paper with J.P. Dias). **Comptes Rendus Academie des Sciences de Paris**, tome 274 (1972), 192–193.
8. “Régularité des solutions d’une équation parabolique non linéaire avec des contraintes unilatérales sur la frontière” (joint paper with J.P. Dias). **Annales de l’Institut Fourier de Grenoble**, vol. 22 (1972), 161–192.
9. “Sur l’existence et la régularité des solutions faibles d’une équation parabolique non linéaire” (joint paper with J.P. Dias). **Journal für die Reine und Angewandte Mathematik**, vol. 260 (1973), 181–199.
10. “Un principe de maximum pour les solutions d’une classe d’inéquations paraboliques quasi-linéaires”. **Archive for Rational Mechanics and Analysis**, vol. 55 (1974), 214–224.
11. “Sur quelques inéquations paraboliques”. **Journal of Mathematical Analysis and Applications**, vol. 45 (1974), 324–347.
12. “Sul problema misto per le equazioni lineari ellittiche del secondo ordine”. **American Journal of Mathematics** 97 (1976), 973–981.
13. “Sur le comportement du maximum ponctuel des solutions de certaines problèmes paraboliques par rapport au temps”. **Comptes Rendus Académie de Sciences**

- de Paris, tome 277 (1974), 995–997.
14. “On the  $W^{2,p}$ -regularity for solutions of mixed problems”. **Journal de Mathématiques Pures et Appliquées**, vol. 53 (1974), 279–290.
  15. “Sur la surjectivité de certains opérateurs non linéaires liés aux inéquations variationnelles” (joint paper with J.P. Dias). **Bollettino della Unione Matematica Italiana**, vol. 10 (1974), 52–59.
  16. “Differentiability for Green’s operators of variational inequalities and applications to the calculus of bifurcation points”. **Journal of Functional Analysis**, vol. 34 (1979), 72–78.
  17. “A remark on the differentiability for Green’s operators of variational inequalities”. **Atti della Accademia Nazionale dei Lincei**, vol. 58, serie 8 (1975), 479–481.
  18. “Existence of strong solutions for a class of nonlinear partial differential equations satisfying nonlinear boundary conditions”. **Annali della Scuola Normale Superiore di Pisa**, 3(1976), 377–404.
  19. “Differentiability and bifurcation points for a class of monotone nonlinear operators”. **Annali di Matematica Pura Applicata**, 110 (1976), 321–333.
  20. “Sul piú grande punto di biforcazione positivo per una classe di operatori potenziali non differenziabili”. **Atti della Accademia Nazionale dei Lincei**, serie 8, 59 (1975), 615–619.
  21. “On bifurcation and asymptotic bifurcation for non differentiable potential operators and for systems of Hammerstein type”. **Studies in Analysis, Advances in Mathematics Supplementary Studies**, vol.4, Academic Press (1979), 241–269.
  22. “Bifurcation dans des espaces de Banach pour une couple d’opérateurs non différentiables à l’origine”. **Comptes Rendus Académie des Sciences de Paris** tome 283 (1976), serie A, 329–331.
  23. “Existence et détermination du premier point de bifurcation pour des couples d’opérateurs non différentiables à l’origine”, **Annali di Matematica Pura ed Applicata** 119 (1979), 379–390.
  24. “Esistenza e calcolo del primo punto di biforcazione asintotica per una coppia di operatori potenziali non differenziabili all’infinito”. **Bollettino della Unione Matematica Italiana**, vol. 15–B (1978), 566–575.
  25. “Inhomogeneous evolution equations in Banach space with bounded variation data”. **Nonlinear Analysis:TMA**, vol. 3 (1979), 249–259.
  26. “On the motion of a non homogeneous ideal incompressible fluid in a external force field” (joint paper with A. Valli). **Rendiconti del Seminario Matematico dell’Università di Padova**, vol. 59 (1978), 117–145.
  27. “On the Euler equations for non-homogeneous fluids (I)” (joint paper with A.

- Valli). **Rendiconti del Seminario Matematico dell'Università di Padova**, 63 (1980), 151–168.
28. “On the Euler equations for non-homogeneous fluids (II)” (joint paper with A. Valli). **J. Math. Analysis Applications**, 73 (1980), 338–350.
  29. “On an Euler type equation in hydrodynamics”. **Annali di Matematica Pura ed Applicata**, 125 (1980), 279–295.
  30. “Existence of  $C^\infty$  solutions of the Euler equations for non-homogeneous fluids” (joint paper with A. Valli). **Communications in Partial Differential Equations**, vol. 5 (1980), 95–107.
  31. “Un théorème d’existence dans la dynamique des fluids compressibles”. **Comptes Rendus Academie des Sciences de Paris**, tome 289 serie B (1979), 297–299.
  32. “On the barotropic motion of compressible perfect fluids”. **Annali Scuola Normale Superiore di Pisa**, vol. 8 (1981), 317–351.
  33. “On the motion of nonhomogeneous fluids in presence of diffusion” (joint paper with R. Serapioni and A. Valli). **Journal of Mathematical Analysis and Applications**, vol. 85 (1982), 179–191.
  34. “Homogeneous and non-homogeneous boundary value problems for first order linear hyperbolic systems arising in fluid-mechanics” (Part I). **Communications in Partial Differential Equations**, vol. 7 (1982), 1135–1149.
  35. “Homogeneous and non-homogeneous boundary value problems for first order linear hyperbolic systems arising in fluid-mechanics” (Part II). **Communications in Partial Differential Equations**, vol. 8 (1983), 407–432.
  36. “On the solutions in the large of the two-dimensional flow of a non-viscous incompressible fluid”. **Journal of Differential Equations**, vol. 54 (1984), 373–389.
  37. “Diffusion on viscous fluids. Existence and asymptotic properties of solutions”. **Annali Scuola Normale Superiore di Pisa**, vol. 10 (1983), 341–355.
  38. “On the suitable weak solutions to the Navier–Stokes equations in the whole space; **Journal de Mathématiques Pures et Appliquées**, vol. 64 (1985), 77–86.
  39. “On the suitable weak solutions of the Navier–Stokes equations via a general approximation theorem”. **Journal de Mathématiques Pures et Appliquées**, vol. 64 (1985), 321–334.
  40. “Local energy inequality and singular set of weak solutions of the boundary non-homogeneous Navier–Stokes problem”, in the volume “**Current Topics in Partial Differential Equations**”, Kinokuniya, Tokyo 1986, dedicated to Professor S. Mizohata in occasion of his sixtieth anniversary.
  41. “On the stationary motion of granulated media”. **Rendiconti del Seminario Matematico dell'Università di Padova**, vol. 77 (1987), 243–253.

42. “Existence and asymptotic behaviour for strong solutions of the Navier–Stokes equations in the whole space”. **Indiana University Math. Journal**, vol. 36 (1987), 149–166.
43. “ $L^p$ –stability for the strong solutions of the Navier–Stokes equations in the whole space” (joint paper with P. Secchi). **Archive for Rational Mechanics and Analysis**, vol. 98 (1987), 65–69.
44. “Stationary motion and the incompressible limit for compressible viscous flows”. **Houston J. of Mathematics**, vol. 13 (1987), 527–544.
45. “An  $L^p$ –theory for the  $n$ –dimensional, stationary compressible, Navier–Stokes equations, and the incompressible limit for compressible fluids. The equilibrium solutions”. **Communications in Mathematical Physics**, vol. 109 (1987), 229–248.
46. “On a stationary transport equations”. **Ann. Univ. Ferrara**, vol. 32 (1986), 79–91.
47. “Existence results in Sobolev spaces for a stationary transport equation”. **Ricerche di Matematica**, vol. 36 (1987) – Supplemento in ricordo di C. Miranda, pag. 173–184.
48. “Boundary–value problems for a class of first order partial differential equations in Sobolev spaces and applications to the Euler flow”. **Rend. Sem. Mat. Univ. Padova**, vol. 79 (1988), 247–273.
49. “Kato’s perturbation theory and well-posedness for the Euler equations in bounded domains”. **Archive Rational Mechanics and Analysis**, vol. 104 (1988), 367–382.
50. “An well–posedness theorem for non–homogeneous inviscid fluids via a perturbation theorem”. **J. Diff. Equations**, vol. 78 (1989), 308–319.
51. “Long time behaviour for one dimensional motion of a general barotropic viscous fluid”. **Archive Rat. Mech. Analysis**, vol. 108 (1989), 141–160.
52. “The stability of one dimensional stationary flows of compressible viscous fluids”. **Annales de l’Institut Henri Poincaré, Analyse non lineaire**, vol. 7 (1990), 259–268.
53. “Attracting properties for one dimensional flows of a general barotropic viscous fluid. Periodic solutions”. **Annali Mat. Pura Applicata**, vol. 161 (1992), 153–165.
54. “Periodic solutions for a class of autonomous Hamiltonian systems”. **Rendiconti Sem. Mat. Univ. Padova**, vol. 83 (1990), 183–192.
55. “On the existence theorem for the barotropic motion of a compressible inviscid fluid in the half–space”, **Annali Mat. Pura Applicata**, vol. 163 (1993), 265–289.
56. “Data dependence in the mathematical theory of compressible inviscid fluids”,

- Arch. Rat. Mech. Analysis**, vol. 119 (1992), 109–127.
57. “Perturbation theory and well-posedness in Hadamard’s sense of hyperbolic initial-boundary value problems”, **Nonlinear Analysis: TMA**, vol. 22 (1994), 1285–1308.
  58. “Perturbation theorems for linear hyperbolic mixed problems and applications to the compressible Euler equations”, **Communications on Pure Applied Mathematics** vol. 46 (1993), 221–259.
  59. “Structural stability and data dependence for fully nonlinear hyperbolic problems”, **Arch. Rat. Mech. Analysis**, vol. 120 (1992), 51–60.
  60. “The initial-boundary value problem for the non-barotropic compressible Euler equations: structural-stability and data dependence”, **Ann. Inst. H. Poincaré, Anal. non linéaire**, vol. 11 (1994), 297–311.
  61. “On the singular limit for slightly compressible fluids”, **Calc. Var.**, vol. 2 (1994), 205–218.
  62. “On the existence of branches of time-periodic solutions to the nonlinear vibrating string equation”, **Nodea**, vol. 1 (1994), 125–148.
  63. “On the sharp singular limit for slightly compressible fluids”, **Math. Methods Appl. Sciences**, 18 (1995), 295–306.
  64. “Singular limits in fluid dynamics”, **Rend. Sem. Mat. Univ. Padova**, 94 (1995), 55–69.
  65. “Singular limits in compressible fluid dynamics”, **Arch. Rat. Mech. Analysis**, 128 (1994), 317–327.
  66. “On the periodic solutions to the Kirchhoff–Bernstein nonlinear wave equation”, **Atti Sem. Mat. Fis. Univ. Modena**, 44 (1996), 295–301.
  67. “Remarks on the flow of holes and electrons in crystalline semiconductors”, in *Navier–Stokes Equations and Related Nonlinear Problems*, A. Sequeira Ed., Plenum–Press (1995), 291–306.
  68. “On some diffusion equations in semiconductor theory”, **C.R. Acad. Sci. Paris**, t. 320, serie I (1995), 1193–1197.
