

Læreruddannelsen i Århus

A Short presentation of the work on
E- Learning courses i Denmark

Content

- Courses in the teacher education
- Development of an in-service course
- Discoussion
- Other decimination

Courses in the teacher education

- I know of several of my colleagues, who has used Johns material on dynamic simulation of stocastic processes – but I have no feed back from that.
- I have feedback from one course in which I have used it myself:
- I have an untranslated course description of a 5 ECTS points course in the New Teacher Education comming in Denmark this autume. I have asked for feedback amungst colleguaes , but has not yet recived any.

Development of an in-service course

We posted a course in autumn 2012, but it was not held

I have a untranslated plan for an in-service course that was to be held in the spring.

But due to a teacher lock out thru all of April it has not been possible to get teachers for the course. I have half an agreement with a school for an august seminar

Discussion points

The categorisation of the used materials?
E-learning?

Decimation

Two parts of the material will be revised to articles:

- *Dynamic simulation of stochastic processes*
- *Billard problem*

Course in Malmø 18. of september

Thank you

tomorrow
